

## ● Strawberry **KAMILA\***

**Plant:** with low chill requirement, suitable for Mediterranean climates. Variety of medium-high vigor, with semi upright habit. Very high yields.

**Flowers:** large size, very rich in pollen, pollination is quick and efficient, even in adverse conditions such as low temperature, high humidity and low light.

**Blossoming time:** medium.

**Fruits:** regular conical shape. Bright red berries, of very vivid colour, with consistent size throughout the harvesting period. Extremely firm pulp with a very sweet and pleasant taste.

**Harvesting time:** medium.

**Overall assessment:** mid-late season variety, suitable for Mediterranean climates. Very high yields. Fruits are large and glossy bright red with exceptional organoleptic characteristics. Its firmness pulp, resistant skin and colour stability make this variety suitable for handling and transport. It is very well suited for use as a fresh plant, while the cold-stored plant provides excellent quality and quantity autumn productions.

Thanks to its vigor and hardiness it is very suitable for the re-planting technique and requires moderate nutritional supplements.
